**How do *Fagus sylvatica* and *Platanus hispanica* manage
environmental conditions in urban areas?**

Key words: *Fagus sylvatica*, *Platanus hispanica*, *P. acerifolia*, distribution,
Denmark, street tree, environmental conditions.

SUMMARY

This article describes the environmental conditions of street trees and how these conditions influence their growth. Based on information obtained from interviews with Danish landscape designers and city gardeners, two species of street trees are described and evaluated. *Fagus sylvatica* does not thrive under urban conditions and is not recommended as a street tree, whereas *Platanus hispanica* which does well is recommended as a street tree.
